

Declaration of Cosmic Humanity

We the people of the United States, speaking for ourselves and all people of the Earth, demand:

That the Congress truly act as representatives of the **people**; that our military and intelligence agencies act fully as is their duty to protect us; that our President and his administration act aggressively and comprehensively in the fullest interest of all to rapidly bring about the following:

1. Full acknowledgement and disclosure of the presence and contact with all known alien species
2. Release of all classified and unclassified information and artifacts directly or indirectly pertaining to the existence, nature, technology, agendas and contact of any kind with alien species
3. Release of all technology, peaceful and/or military, developed from alien information, back engineering, donation, or capture.
4. Resist and remove all “need to know” restrictions on the Office of the President as inherently obstructive to its function.

Conditions have radically changed since the U.S. government commissioned study by the Hudson Institute recommended that information about the Roswell crash be kept from the public for fear of panic, and its negative effects on religion. Sixty years later, public exposure to media presentations, news reports, testimonies by military and civilian contactees, increasing release of classified information by a number of countries, and the global release of a public data base garnered by thousands of cell phone cameras has served as an uncontrolled disclosure. The public is more prepared for formal disclosure than the government is to take that overdue action.

We are being offered a place in cosmic society and the advantages of that are profound. The immediate advantages of the release of advanced technology such as free energy and antigravity would solve the planet’s energy crisis quickly and completely, and facilitate moving from primitive competition to planetary cooperation.

We the people demand that full disclosure include:

1. A true and accurate accounting of our species’ genetic creation, part alien nature, and all information known or held concerning contact past and present with our parent species, the Anunnaki. Additionally, knowledge about their intentions and agendas with regard to us, when they may return to Earth and for what purpose, how many of them and who the individuals are that may currently be resident on Earth, must be shared.

2. The educational and academic communities are to be enlisted and engaged in the process of full disclosure and the knowledge is to be fully integrated into all levels of the educational system.
3. Intensive, cooperative, full ranging studies be commissioned on the academic graduate levels with mandatory free exchange of information, with emphasis on the ramifications of disclosure and the post-disclosure human.

Our species' relationship with the Anunnaki is critical to our understanding of who and what we are. The suppression of this information causes our species to be confused and obstructed with regard to our adaptive evolutionary trajectory in general because it is at root of our religious and cultural internecine conflicts and wars. This pathological introversion of our species clearly has a lethal potential to destroy us. Our status as a peaceful, unified species is the essential condition for matriculation into stellar society.

We the people demand that full disclosure include:

1. All astrophysical information, classified and unclassified, concerning Planet X / Nibiru, its rediscovery and announcement by the 1983 Infrared Imaging Satellite team, its coverup because the home planet of our parent species, the Anunnaki; the details of its orbital configuration as a member of our solar system, time of return to perigee in the Asteroid Belt area and its current incoming position.
2. Full transparency in ongoing astronomical observations, reports, evaluations and warnings concerning the relative severity of physical climate and Earth changes already occurring due to its incoming trajectory as well as possible devastating effects of its passing through the inner solar system in the near future.

Past history and archaeological, geological, anthropological, and genetic information, as well as the body of legends of cultures throughout the planet attest to the cataclysmic effects of some, but not all, Passings of Planet X / Nibiru in the past. The issue is that humanity could be facing literal extinction. It is imperative that we, as a species, be as informed and prepared as possible on a planetarily, mutually supportive, cooperative basis. Failure to disclose and provide all possible information, aid and protection would be a gross failure of leadership, and a capital crime against humanity.

Attachment to letter:

President and Mrs. Barack Obama
June 17, 2011
