

UFO Recorded Over Lima International Airport (Peru)

February 19, 2006

Research by Renato Longato

UFO captured on video by Aviation Pilot Captain Kui Sam Cheu Moreno over the Jose Chavez International Airport (Lima, Peru) on February 19, 2006 at 14:08 hours.

The eyewitness has 11,500 hours of flight time as a civil aviation pilot and on that occasion was returning from a Panama to Lima flight with COPA Airlines.

During the interview with Peruvian researcher Renato Longato, Captain Sam Cheu estimated that the strange object was 1500 feet away and that it flew at the prodigious speed of 83,500 km/s in an East-West direction.

The recording was done toward runway 1-5 of the Jose Chavez International Airport in Lima, Peru.

According to the pilot's investigation, the Control Tower did not record the presence of this unusual object.

Eyewitness Account by Capt. Kui Sam Cheu Moreno:

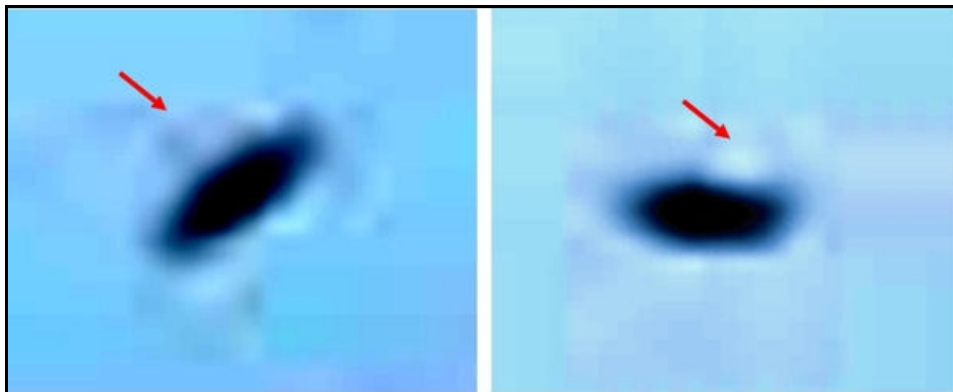

“At one point of the recording, something like a small black spot quickly traveled from left to right on the screen. I tried to see it in slow-motion to see what it was, believing that it could be a bird or an airliner flying over the area.”

“After this event, which really caused me to experience a significant shift in my life and thoughts, I’m definitely convinced that we are not alone. They are trying to give us a message so that we may see things in our world with greater clarity.”

Photo Analysis

The sequence of UFO photos was placed in the hands of Mexican UFO researcher Ana Luisa Cid, acknowledged for her conduct and impartiality, in order to have it them duly analyzed. Captain Kui Sam Cheu and the researcher would like to express their thanks for her cooperation.

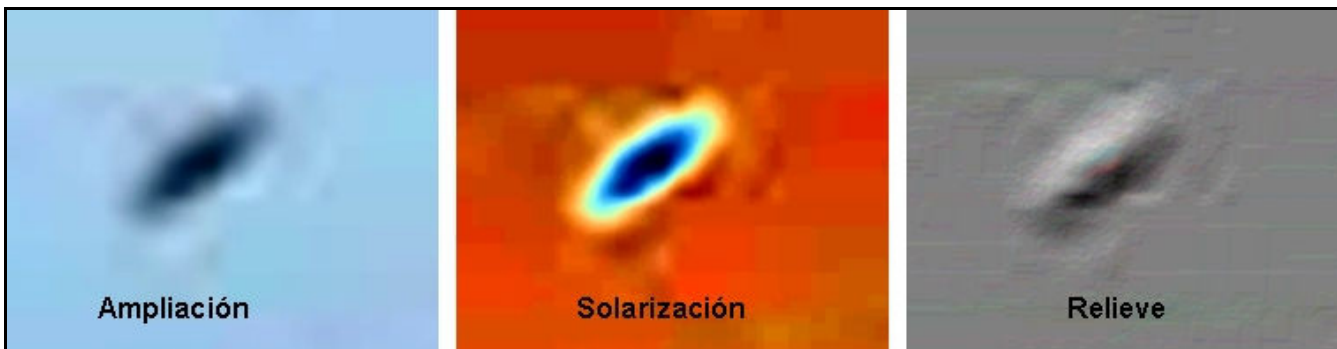

The arrows suggest the UFO’s “dome”.

Comments by Ana Luisa Cid

My thanks to Capt. Sam Cheu and researcher Renato Longato for placing their trust in my work. They have my admiration and respect.

I personally believe that the Lima video constitutes solid proof of the visit of strange artifacts that roam the skies the of any country of the world. We seldom have the chance to have qualified air personnel provide us with evidence of this kind.

To see the video, access Renato Longato's web page.
